Digiarty Software, Inc.

Product Overview

Air Playit --- Free Software to Stream Video & Music to iPhone iPad Android Anywhere

Air Playit is a video streaming software designed to stream videos audios to Apple iPhone, iPad, iPod touch and Google Android OS mobile devices. Air Playit is capable of streaming 320 different video & audio formats to your mobile devices over WiFi and 3G/4G network. It acts as your personal audio video cloud server and lets you watch videos on the go.

Highlighted Features

Stream Video

- **Live Conversion and Streaming**

Air Playit is able to convert videos on the fly and stream videos to iPhone, iPad, iPod touch and Android. Watch MKV, AVI, WMV videos immediately without doing any tedious and lengthy converting of these files beforehand.

- **Offline Conversion and Download**

Air Playit is also a remote video converter software. With the built-in offline task manager, you can add and manage video conversion tasks on your iPhone iPad, and download the videos to your devices via WiFi and 3G/4G.

- **Access Playlist via Web Browser**

The built-in HTTP server lets you access the audios and videos stored on your PC or Mac via any web browser. That is to say, you can use VLC and Apple QuickTime player to play the streaming video easily.

- **Apple-TV Out Ready**

Air Playit supports Apple TV-Out so that you can stream video & music to TV via iPhone iPad. It gives you the options to customize the output quality and adjust video audio parameters, such as resolution, overscan, etc.

- **Support Local & Remote Connection**

Air Playit can stream videos over local WiFi, remote WiFi, 3G and 4G. It supports automated server discovery on local network by Bonjour Service. You can also add remote server by specifying IP address.

Stream Music

- **Streaming Music to iPhone iPad iPod**

Air Playit turns your iPhone iPad into an auto-update music library by streaming audios from computer to the device over WiFi, 3G/4G. No syncing required. Support MP3, AAC, AIFF, WAV audio formats.

- **Auto Cache Music Library**

Air Playit will automatically cache the music when it is played on your device for the first time. You can play the cached music on your iPhone iPad when you have no network connection.

Stream Download

- **Download Video Audio over the Air**

Air Playit can help you stream the video and download to your iPad/iPhone over the air via WiFi, 3G, 4G network. Then you can watch the video later when there is no network available.

- **How to Download Video Audio via WiFi**

Find the video you want to download and tap "Download to iPhone/iPad". It will start downloading immediately. You can check and manage the download process in the Task queue.

Download Air Playit

Air Playit works in two parts. A piece of server software sits on PC or Mac for sharing the media files from local hard drive or iTunes playlist. The other component is an iPhone/iPad app that connects to the server and lets users to browse and play video.

Part 1: Air Playit Server
